Revit Model Detailed Check

107 Checks | 16 Pass | 10 Fail | 3 Errors | 78 Count/List

1. CRITICAL

10 Checks | 2 Pass | 0 Fail | 8 Count/List

This section contains issues that may compromise model coordination, documentation reliability or project delivery. Critical findings should be reviewed and resolved before further project development..

Warnings

COUNT and LIST of all warnings in the model. Too many unresolved warnings can cause performance issues in a Revit model.

Count: 390

Name
A wall and a room separation line overlap. One of them may be ignored when Revit finds room boundaries. Shorten or delete the room separation line to remove the overlap.
A wall and a room separation line overlap. One of them may be ignored when Revit finds room boundaries. Shorten or delete the room separation line to remove the overlap.
A wall and a room separation line overlap. One of them may be ignored when Revit finds room boundaries. Shorten or delete the room separation line to remove the overlap.
A wall and a room separation line overlap. One of them may be ignored when Revit finds room boundaries. Shorten or delete the room separation line to remove the overlap.
A wall and a room separation line overlap. One of them may be ignored when Revit finds room boundaries. Shorten or delete the room separation line to remove the overlap.
A wall and a space separation line overlap. One of them may be ignored when Revit finds space boundaries. Shorten or delete the space separation line to remove the overlap.
A wall and a space separation line overlap. One of them may be ignored when Revit finds space boundaries. Shorten or delete the space separation line to remove the overlap.
A wall and a space separation line overlap. One of them may be ignored when Revit finds space boundaries. Shorten or delete the space separation line to remove the overlap.
A wall and a space separation line overlap. One of them may be ignored when Revit finds space boundaries. Shorten or delete the space separation line to remove the overlap.
Domestic Cold Water 103: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 37: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 39: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 41: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 42: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 82: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 86: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 90: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 91: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 92: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 93: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 94: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Cold Water 99: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Hot Water 12: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.
Domestic Hot Water 13: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.

Domestic Hot Water 14: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.

Domestic Hot Water 15: It is not possible to calculate the flow since the flow direction mismatch. Please check flow direction on all equipment in this system.

Elements have duplicate "Mark" values.

Elements have duplicate "Mark" values.

Elements have duplicate "Mark" values.

Showing first 30 of 390 → see Appendix

Linked Revit Files and Their Link Method
COUNT and LIST of the link method (overlay vs. attach) for each Revit link in the model.
Count: 0

Linked Revit Files Not Pinned in Place
PASS/FAIL check to determine if any linked Revit files are not pinned in place. Will Fail if any are found.
Count: 0

Linked CAD Files
COUNT and LIST of all linked CAD files in the model.
Count: 0

Linked CAD File Visible in All Views
COUNT and LIST of all linked CAD files not set to Current View Only.
Count: 0

Linked CAD File Not Pinned in Place
PASS/FAIL check to determine if any linked CAD files are not pinned in place. Will Fail if any are found.
Count: 0

Imported CAD files
COUNT and LIST of all CAD files that were Imported and not Linked.
Count: 5

Imported SKP files
COUNT of all imported SKP files in the model.
Count: 0

Raster Images
COUNT and LIST of all raster images placed in the model.
Count: 0

Non built-in Object Styles (imported CAD)
COUNT and LIST of all non built-in categories and sub-categories in a Revit model. Excessive non-standard styles often signal imported CAD. Importing CAD files is not recommended for most workflows as it disrupt standard.
Count: 191

Unplaced Rooms
PASS/FAIL check to determine if any rooms are unplaced. Will Fail if any are found.
Count: 0

Redundant and Unenclosed Rooms
PASS/FAIL check to determine if any rooms are in the same location as another room. Will fail if any are found.
Count: 0

Unique Room Number
PASS/FAIL check to determine if there are rooms with the same number. Will fail if any are found.
Count: 0

Coordinates

10 Checks | 6 Pass | 3 Fail | 1 Count/List

Project Coordinates
COUNT and LIST of the coordinate values of the survey and project base points, elevation, and true north.
Count: 5

Name	Value
Project Base Point Coordinate	0" E/W | 0" N/S
Project Base Point Elevation	0"
Project Base Point Rotation	0.00°
Survey Point Coordinate	298' - 0 3/8" E/W | 141' - 1" N/S
Survey Point Elevation	194' - 0"

Survey Point - N/S
PASS/FAIL check to determine if the N/S value for the Survey Point is at the designated location. Value is defined by User Input and should match the "AsDouble" value for validation. Use the RevitLookup add-in to identify the "AsDouble" value.
The N/S value is incorrect for the Survey Point.
Count: 1

Category	Name	ID
Survey Point	Survey Point :	1185495

Survey Point - E/W
PASS/FAIL check to determine if the E/W value for the Survey Point is at the designated location. Value is defined by User Input and should match the "AsDouble" value for validation. Use the RevitLookup add-in to identify the "AsDouble" value.
The E/W value is incorrect for the Survey Point.
Count: 1

Category	Name	ID
Survey Point	Survey Point :	1185495

Survey Point - Elev
PASS/FAIL check to determine if the Elev value for the Survey Point is at the designated location. Value is defined by User Input and should match the "AsDouble" value for validation. Use the RevitLookup add-in to identify the "AsDouble" value.
The Elev value is incorrect for the Survey Point.
Count: 1

Category	Name	ID
Survey Point	Survey Point :	1185495

Survey Point - Latitude
PASS/FAIL check to determine if the Latitude value for the Survey Point is at the designated location. Provide degree value in radians (1 deg = 0.0174533 rad). Value is defined by User Input.
Count: 0

Survey Point - Longitude
PASS/FAIL check to determine if the Longitude value for the Survey Point is at the designated location. Provide degree value in radians (1 deg = 0.0174533 rad). Value is defined by User Input.
Count: 0

Project Base Point - N/S
PASS/FAIL check to determine if the N/S value for the Project Base Point is at the designated location. Value is defined by User Input and should match the "AsDouble" value for validation. Use the RevitLookup add-in to identify the "AsDouble" value.
Count: 0

Project Base Point - E/W
PASS/FAIL check to determine if the E/W value for the Project Base Point is at the designated location. Value is defined by User Input and should match the "AsDouble" value for validation. Use the RevitLookup add-in to identify the "AsDouble" value.
Count: 0

Project Base Point - Elev
PASS/FAIL check to determine if the Elev value for the Project Base Point is at the designated location. Value is defined by User Input and should match the "AsDouble" value for validation. Use the RevitLookup add-in to identify the "AsDouble" value.
Count: 0

Project Base Point - Angle to True North
PASS/FAIL check to determine if the Angle to True North for Project Base Point is at the designated angle. Provide degree value in radians (1 deg = 0.0174533 rad). Value is defined by User Input.
Count: 0

Spaces

4 Checks | 3 Pass | 0 Fail | 1 Count/List

Spaces
COUNT and LIST of all spaces in the model. This includes unplaced and redundant spaces.
Count: 172

Category	Name
Spaces	Spaces : (E) Conf 2
Spaces	Spaces : (E) Corridor 125
Spaces	Spaces : (E) Space 101
Spaces	Spaces : (E) Space 11
Spaces	Spaces : (E) Space 130

Spaces	Spaces : (E) Space 241
Spaces	Spaces : (E) Space 303
Spaces	Spaces : (E) Space 304
Spaces	Spaces : (E) Space 305
Spaces	Spaces : (E) Space 306
Spaces	Spaces : (E) Space 307
Spaces	Spaces : (E) Space 308

Showing first 30 of 172 → see Appendix

Unplaced Spaces
PASS/FAIL check to determine if any spaces are unplaced. Will Fail if any are found.
Count: 0

Redundant and Unenclosed Spaces
PASS/FAIL check to determine any spaces are in the same location as another space. Will Fail if any are found.
Count: 0

Unique Space Number
PASS/FAIL check to determine if there are spaces with the same number. Will Fail if any are found.
Count: 0

Areas

3 Checks | 1 Pass | 0 Fail | 2 Count/List

Area Space Schemes
COUNT and LIST of all area schemes in a Revit model.
Count: 2

Name
Gross Building
Rentable

Areas
COUNT and LIST of all area elements in the model. This includes unplaced and redundant areas .
Count: 1

Category	Name
Areas	Areas : Area 1

Areas Not Placed
PASS/FAIL check for any areas that are not placed, regardless of area scheme.
Count: 0

Project Information
COUNT and LIST of all parameters and values attached to Project Information for a project except those associated with Revit Extensions (starting with 'Extensions').
Count: 36

4. BIM STANDARD

9 Checks | 0 Pass | 1 Fail | 8 Count/List

xxxx.

Levels and Grids

6 Checks | 0 Pass | 1 Fail | 5 Count/List

Levels
COUNT and LIST of all level elements in the model.
Count: 7

Category	Type	Name
Levels	1/4" Head	Levels : 1/4" Head
Levels	1/4" Head	Levels : 1/4" Head
Levels	1/4" Head	Levels : 1/4" Head
Levels	1/4" Head	Levels : 1/4" Head
Levels	1/4" Head	Levels : 1/4" Head
Levels	1/4" Head	Levels : 1/4" Head
Levels	1/4" Head	Levels : 1/4" Head

Level Types
COUNT and LIST of all level types in the model.
Count: 1

Category	Type	Name
Levels	1/4" Head	Levels : Type : 1/4" Head

Grids
COUNT of all grid elements in the model.
Count: 27

Grid Types
COUNT and LIST of all grid types in the model.
Count: 1

Category	Type	Name
Grids	1/4" Bubble	Grids : Type : 1/4" Bubble

Wrong Elements on Shared Levels and Grids
COUNT and LIST of all elements in the model that are on the 'Shared Levels and Grids' workset that are not levels or grids. Note that the 'Shared Levels and Grids' workset must have both 'level' and 'grid' (case insensitive) in the name in order to be recognized.
Result: *Not Workshared*

Levels and Grids on Wrong Workset
PASS/FAIL check to determine if any levels or grids are not on the Shared Levels and Grids workset. Will Fail if any are found.
These levels and grids are not on the Shared Levels and Grids workset
Count: 34

Category	Type	Name	ID
Grids	1/4" Bubble	Grids : 1/4" Bubble	752669
Grids	1/4" Bubble	Grids : 1/4" Bubble	752702
Grids	1/4" Bubble	Grids : 1/4" Bubble	752709
Grids	1/4" Bubble	Grids : 1/4" Bubble	752695
Grids	1/4" Bubble	Grids : 1/4" Bubble	752688
Grids	1/4" Bubble	Grids : 1/4" Bubble	752716
Grids	1/4" Bubble	Grids : 1/4" Bubble	752730
Grids	1/4" Bubble	Grids : 1/4" Bubble	752746
Grids	1/4" Bubble	Grids : 1/4" Bubble	752760
Grids	1/4" Bubble	Grids : 1/4" Bubble	752774

Showing first 10 of 34 → see Appendix

Worksets and Elements
COUNT and LIST of all user worksets for a Revit model or indicates '*Not Workshared*' if worksharing is not enabled.
Result: *Not Workshared*

Worksets
COUNT and LIST of all user worksets in the model or indicates '*Not Workshared*' if worksharing is not enabled.
Result: *Not Workshared*

Browser Organization
COUNT and LIST of all browser organization types in the model.
Count: 31

5. MODEL QUALITY

23 Checks | 1 Pass | 1 Fail | 2 Errors | 19 Count/List

This section evaluates overall model cleanliness, maintainability and BIM authoring practices. Checks focus on elements that may increase model complexity, reduce performance, complicate coordination workflows or indicate poor modelling practices. Results help identify opportunities for model optimization and standardization.

Model Elements

10 Checks | 1 Pass | 1 Fail | 1 Errors | 7 Count/List

Total Model Elements Revit 2026
COUNT of all model elements placed in the model for Revit 2026. This check is version specific due to changes in Revit categories between versions. This check should be used as a general assessment of the number of elements in the model, as some categories may report sub-elements as individual elements.
Count: 13,330

Model Groups
COUNT of all model group elements in the model. Too many model groups can be an indication of improper modeling techniques.
Count: 47

Detail Groups
COUNT of all detail group elements in the model. Too many detail groups can be an indication of improper modeling techniques.
Count: 0

In-Place Families
COUNT of all in-place family elements in the model. In-place families can signifcantly impact model size and performance and should be used sparingly.
Count: 1,191

Generic Models
COUNT and LIST of all generic model elements in the model.
Count: 1,225

Category	Family	Type	Name
Generic Models	1	12939	Generic Models : 1 : 12939
Generic Models	10	40047	Generic Models : 10 : 40047
Generic Models	100	1171	Generic Models : 100 : 1171

Generic Models	125	32398	Generic Models : 125 : 32398

Showing first 30 of 1225 → see Appendix

Assemblies
COUNT and LIST of all assembly elements in the model.
Count: 0

Duplicate Modeled Elements
PASS/FAIL check to determine if there are any modeled elements that are duplicates (identical elements at the same location and base level). Check will Fail if any duplicate element is found. **WARNING** Running this check can take a significant amount of time to complete.
Count: 0

Mirrored Elements
PASS/FAIL check to determine if there are mirrored instances of loadable components. Check will fail if any element is mirrored.
The following elements have been mirrored.
Count: 1,267

Category	Family	Type	Name	ID
Air Terminals	AT-1 (Spiral Duct Mounted - Supply)	12 x 4	Air Terminals : AT-1 (Spiral Duct Mounted - Supply) : 12 x 4	1621367

6. DOCUMENTATION

12 Checks | 0 Pass | 2 Fail | 10 Count/List

Review of documentation completeness and drawing structure.

All Discipline Families

12 Checks | 0 Pass | 2 Fail | 10 Count/List

Views
COUNT of all views in the model. Views typically do not impact model size, but too many unmanaged views can impact user efficiency.
Count: 36

Schedules
COUNT of all schedules in the model. Schedules typically do not impact model size, but too many unmanaged views can impact user efficiency.
Count: 27

Sheets
COUNT and LIST of all sheets in the model. Sheets typically do not impact model size, but too many unmanaged views can impact user efficiency.
Count: 2

Category	Type	Name
Sheets	Drawing Sheet	Section
Sheets	Drawing Sheet	Window Detail

Placeholder Sheets
COUNT and LIST of all placeholder sheets in the model.
Count: 0

Views With Hidden Model Elements
COUNT and LIST of all views in the model that have permanently hidden model elements and the total number of hidden elements. Hiding large numbers of elements in a videw can impact performance. **WARNING** Running this check can take a significant amount of time to complete.
Count: 4

Count	Name
1	3D View - All
1	3D View - Architectural
1	3D View - MEP
1	3D View - Structural

Views With No View Template
COUNT of all views that have no View Templates assigned to them in the model. This may be indicative of unneeded working views that can be removed from a model.
Count: 36

Views Not On Sheets
COUNT and LIST of all views (not including views that can be placed on more than one sheet, like Schedules and Legends) that are not placed on a sheet in the model.
Count: 31

Name
3D View - 3D for Export to Civil
3D View - 3D View 1
3D View - 3D View 2
3D View - All

Scope Boxes
COUNT and LIST of all the scope boxes used in the model
Count: 0

7. MODEL CONTENT

23 Checks | 0 Pass | 3 Fail | 20 Count/List

This section provides an inventory of model content, including families, system components and discipline-specific elements. It helps understand model composition, identify excessive content and support model cleanup activities.

Arch System Families

10 Checks | 10 Count/List

Reports of architectural system families in the model

Ceiling Families
COUNT and LIST of all ceiling family types in the model.
Count: 3

Category	Type	Name
Ceilings	2' x 2' ACT System - ACT-1	Ceilings : Type : 2' x 2' ACT System - ACT-1
Ceilings	5/8" GWB on Mtl. Stud	Ceilings : Type : 5/8" GWB on Mtl. Stud
Ceilings	Basic	Ceilings : Type : Basic

Curtain System
COUNT and LIST of all architectural curtain system family types in the model.
Count: 1

Category	Type	Name
Curtain Systems	6' x 6'	Curtain Systems : Type : 6' x 6'

Curtain Wall Mullion Families
COUNT and LIST of all curtain wall mullion family types in the model.
Count: 5

Category	Family	Type	Name
Curtain Wall Mullions	Rectangular Mullion	1" x 1" Rectangular	Curtain Wall Mullions : Type : Rectangular Mullion : 1" x 1" Rectangular
Curtain Wall Mullions	Rectangular Mullion	2" x 6" Rectangular	Curtain Wall Mullions : Type : Rectangular Mullion : 2" x 6" Rectangular
Curtain Wall Mullions	Rectangular Mullion	2.5" x 5" Rectangular	Curtain Wall Mullions : Type : Rectangular Mullion : 2.5" x 5" Rectangular
Curtain Wall Mullions	Rectangular Mullion	2.5" x 6" Rectangular - Bottom Sill	Curtain Wall Mullions : Type : Rectangular Mullion : 2.5" x 6" Rectangular - Bottom Sill
Curtain Wall Mullions	Rectangular Mullion	2.5" x 6" Rectangular - Top Sill	Curtain Wall Mullions : Type : Rectangular Mullion : 2.5" x 6" Rectangular - Top Sill

Floor Families
COUNT and LIST of all floor family types in the model.
Count: 16

Category	Type	Name
Floors	1 1/2" Metal Roof Deck	Floors : Type : 1 1/2" Metal Roof Deck
Floors	3 1/4" LW Concrete on 3" Metal Deck	Floors : Type : 3 1/4" LW Concrete on 3" Metal Deck

Floors	Floor Finish - RF-4	Floors : Type : Floor Finish - RF-4
Floors	Floor Finish - WO-1	Floors : Type : Floor Finish - WO-1
Floors	Parking Surface - 4"	Floors : Type : Parking Surface - 4"

Railing Families
COUNT and LIST of all railing family types in the model.
Count: 1

Category	Type	Name
Railings	Guardrail - Rectangular	Railings : Type : Guardrail - Rectangular

Ramp Families
COUNT and LIST of all ramp family types in the model.
Count: 1

Category	Type	Name
Ramps	Ramp 1/12	Ramps : Type : Ramp 1/12

Roof Families
COUNT and LIST of all roof family types in the model.
Count: 2

Category	Type	Name
Roofs	Insulation on Metal Deck - EPDM	Roofs : Type : Insulation on Metal Deck - EPDM
Roofs	Sloped Glazing	Roofs : Type : Sloped Glazing

Site Families
COUNT and LIST of all site family types in the model.
Count: 5

Category	Family	Type	Name
Site	Fiber Optic Connection	Standard	Site : Type : Fiber Optic Connection : Standard
Site	Gas Connection	28"x28"	Site : Type : Gas Connection : 28"x28"
Site	Roof Drain(s) Connection	20"x20"	Site : Type : Roof Drain(s) Connection : 20"x20"
Site	Sanitary Sewer Connection	20"x20"	Site : Type : Sanitary Sewer Connection : 20"x20"
Site	Water Connection	28"x28"	Site : Type : Water Connection : 28"x28"

Stair Families
COUNT and LIST of all stair family types in the model.
Count: 4

Category	Type	Name
Stairs	Cast-In-Place Stair	Stairs : Type : Cast-In-Place Stair
Stairs	Precast Stair	Stairs : Type : Precast Stair
Stairs	Steel Pan Stair	Stairs : Type : Steel Pan Stair
Stairs	Steel Pan Stair	Stairs : Type : Steel Pan Stair

Wall Families
COUNT and LIST of all wall family types in the model.
Count: 20

Category	Type	Name
Walls	(1) 5/8" GWB	Walls : Type : (1) 5/8" GWB
Walls	8" - Filled	Walls : Type : 8" - Filled
Walls	8" - Filled (2)	Walls : Type : 8" - Filled (2)
Walls	Cork Board	Walls : Type : Cork Board
Walls	Curtain Wall	Walls : Type : Curtain Wall
Walls	D 3 D_Core	Walls : Type : D 3 D_Core
Walls	Exterior Wall - Precast Panel	Walls : Type : Exterior Wall - Precast Panel
Walls	Foundation - 12" Concrete	Walls : Type : Foundation - 12" Concrete
Walls	Foundation - 24" Concrete	Walls : Type : Foundation - 24" Concrete
Walls	Interior - 3 1/8" Partition (1-hr)	Walls : Type : Interior - 3 1/8" Partition (1-hr)
Walls	Interior - 4 1/4" Partition TYPE 10	Walls : Type : Interior - 4 1/4" Partition TYPE 10
Walls	Interior - 4 7/8" Partition (1-hr) TYPE 4	Walls : Type : Interior - 4 7/8" Partition (1-hr) TYPE 4

Foundation Families
COUNT and LIST of all foundation family types in the model.
Count: 10

Category	Family	Type	Name
Structural Foundations		18" Foundation Slab	Structural Foundations : Type : 18" Foundation Slab
Structural Foundations		3' Foundation Slab	Structural Foundations : Type : 3' Foundation Slab
Structural Foundations		Bearing Footing - 36" x 18"	Structural Foundations : Type : Bearing Footing - 36" x 18"
Structural Foundations		Bearing Footing - 4'-10" x 1'-6"	Structural Foundations : Type : Bearing Footing - 4'-10" x 1'-6"
Structural Foundations	Footing-Rectangular	F5	Structural Foundations : Type : Footing-Rectangular : F5
Structural Foundations	Footing-Rectangular	F6	Structural Foundations : Type : Footing-Rectangular : F6
Structural Foundations	Footing-Rectangular	F7	Structural Foundations : Type : Footing-Rectangular : F7
Structural Foundations	Footing-Rectangular	F7*	Structural Foundations : Type : Footing-Rectangular : F7*
Structural Foundations	Stepped Footing2	Stepped Footing	Structural Foundations : Type : Stepped Footing2 : Stepped Footing
Structural Foundations	Stepped Footing3	Stepped Footing	Structural Foundations : Type : Stepped Footing3 : Stepped Footing

Rebar Families
COUNT and LIST of all rebar family types in the model.
Count: 7

Category	Type	Name
Structural Rebar	#7	Structural Rebar : Type : #7
Structural Rebar	00	Structural Rebar : Type : 00
Structural Rebar	Standard - 180 deg.	Structural Rebar : Type : Standard - 180 deg.
Structural Rebar	Standard - 90 deg.	Structural Rebar : Type : Standard - 90 deg.
Structural Rebar	Stirrup/Tie - 135 deg.	Structural Rebar : Type : Stirrup/Tie - 135 deg.
Structural Rebar	Stirrup/Tie - 90 deg.	Structural Rebar : Type : Stirrup/Tie - 90 deg.
Structural Rebar	Stirrup/Tie Seismic - 135 deg.	Structural Rebar : Type : Stirrup/Tie Seismic - 135 deg.

Wall Families
COUNT and LIST of all wall family types in the model.
Count: 20

Category	Type	Name
Walls	(1) 5/8" GWB	Walls : Type : (1) 5/8" GWB
Walls	8" - Filled	Walls : Type : 8" - Filled
Walls	8" - Filled (2)	Walls : Type : 8" - Filled (2)
Walls	Cork Board	Walls : Type : Cork Board
Walls	Curtain Wall	Walls : Type : Curtain Wall
Walls	D 3 D_Core	Walls : Type : D 3 D_Core
Walls	Exterior Wall - Precast Panel	Walls : Type : Exterior Wall - Precast Panel
Walls	Foundation - 12" Concrete	Walls : Type : Foundation - 12" Concrete

Walls	Foundation - 24" Concrete	Walls : Type : Foundation - 24" Concrete
Walls	Interior - 3 1/8" Partition (1-hr)	Walls : Type : Interior - 3 1/8" Partition (1-hr)
Walls	Interior - 4 1/4" Partition TYPE 10	Walls : Type : Interior - 4 1/4" Partition TYPE 10
Walls	Interior - 4 7/8" Partition (1-hr) TYPE 4	Walls : Type : Interior - 4 7/8" Partition (1-hr) TYPE 4
Walls	Interior - 4 7/8" Partition TYPE 3	Walls : Type : Interior - 4 7/8" Partition TYPE 3
Walls	Interior - 6 1/4" Partition (2hr Shaftwall) TYPE 23	Walls : Type : Interior - 6 1/4" Partition (2hr Shaftwall) TYPE 23
Walls	Interior - 6 1/4" Partition (2-hr) TYPE 22	Walls : Type : Interior - 6 1/4" Partition (2-hr) TYPE 22
Walls	Interior - 6 1/8" Partition (2-hr) TYPE 8	Walls : Type : Interior - 6 1/8" Partition (2-hr) TYPE 8
Walls	Resin Panel	Walls : Type : Resin Panel
Walls	Retaining - 14" Concrete	Walls : Type : Retaining - 14" Concrete
Walls	Screen - 8"	Walls : Type : Screen - 8"
Walls	White Board	Walls : Type : White Board

APPENDIX

Tables displayed in this appendix are limited to **200 records**. Complete datasets and full element listings are available in the accompanying Excel export.

How to use Excel data

1 Overview of all checks

Open the **"Checks"** tab to see the complete list of all performed checks along with their summary results and total counts.

Revit File	Check Name	Description	Result	Failure Messag	Result Messag	Error	Count
Sample Model.rvt	Warnings	COUNT of all warnings in the model. Too many unreso	Report				390
Sample Model.rvt	Linked Revit Files and Their Link Metho	COUNT and LIST of the link method (overlay vs. attach)	Report				0
Sample Model.rvt	Linked Revit Files Not Pinned in Place	PASS/FAIL check to determine if any linked Revit files	Pass	There are linked Revit models that are not pinne			0
Sample Model.rvt	Linked CAD Files	COUNT and LIST of all linked CAD files in the model.	Report				0
Sample Model.rvt	Linked CAD File Visible in All Views	COUNT and LIST of all linked CAD files not set to Curre	Report				0
Sample Model.rvt	Linked CAD File Not Pinned in Place	PASS/FAIL check to determine if any linked CAD files a	Pass	The following linked DWG files are not pinned in			0

Duct Systems That Are Not Connected (Expanded Results)

Category	Family	Type	Name	ID
Air Terminals	AT-10 (Perforated Diffuser w Fire Damper - Return)	Workplane-based Return Diffuser	Air Terminals : AT-10 (Perforated Diffuser w Fire Damper - Return) : Workplane-based Return Diffuser	1625948
Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624371
Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624370
Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624375
Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624374
Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624373
Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624372
Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624377

Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624376
Air Terminals	AT-11 (Perforated Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-11 (Perforated Diffuser - Return) : Workplane-based Return Diffuser	1624369
Air Terminals	AT-2 (Plaque Diffuser - Supply)	2' x 2' Diff w 6" Neck	Air Terminals : AT-2 (Plaque Diffuser - Supply) : 2' x 2' Diff w 6" Neck	1620338
Air Terminals	AT-3 (Linear Slot Diffuser - Supply)	48x3 3/4-8 In Inlet 2-Slot	Air Terminals : AT-3 (Linear Slot Diffuser - Supply) : 48x3 3/4-8 In Inlet 2-Slot	1622980
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1619520
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1619533
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1619595
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620273
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620275
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620277
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620279
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620281
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620284
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620287
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620290
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620292
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620294
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620296
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620298
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620301
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620305
Air Terminals	AT-5 (Plaque Diffuser - Return)	Workplane-based Return Diffuser	Air Terminals : AT-5 (Plaque Diffuser - Return) : Workplane-based Return Diffuser	1620309
